SFRA Testing

Once the cartridge is installed and integrated based on instructions, please try to place an order on your sandbox to test the storefront functionality.

Stripe test values can be found in the Stripe documentation (https://stripe.com/docs/testing). This includes a number of test Credit Cards for use in testing a wide variety of scenarios. However, the test Credit Cards only work while using your test secret and publishable API keys. Further, you cannot use real Credit Card numbers with your test API keys.

Monitoring and testing the integration against the Stripe Dashboard is highly encouraged. Aside from what Credit Card numbers can be used, Stripe functions largely the same with both test and live transactions. Once you've satisfactorily completed and tested your integration, merely change your two Stripe API keys to take your integration live.

Checkout

Step 1: Add Product into cart.

Step 2: View the cart page or expand mini cart.

Step 3: Click on "Checkout" button.

Step 4: Checkout as Guest or login to your account.

Step 5: Fill shipping address or select shipping address from saved address and select shipping method.

Step 6: Click on "Next: Payment" button.

Step 7: Fill billing address or select billing address from saved address, fill email, phone Number and select payment method as "Credit card" and enter test data from https://stripe.com/docs/testing or just use the card number 4242424242424242 and any CVV and expiration.
